ON-PREMISES LAN

Deployment of Database (Oracle XE) and Application Server (Tomcat & IIS) running on Single /Dual server on-premise

ON-PREMISES CLOUD

Deployment of Database (Oracle XE) and Application Server (Tomcat & IIS) running on Single/Dual server on Cloud

PUBLIC CLOUD

Deployment of Database (Oracle XE) and Application Server (Tomcat & IIS) running on Single/Dual server on Cloud

CAFM

Product Features

Our Computer-Aided Facility Management (CAFM) system is a comprehensive, web-based solution designed to streamline and enhance facility management operations.

Tailored for diverse industries, our CAFM system integrates various aspects of facility management into a single platform, providing real-time access, advanced reporting, and efficient management tools.

APPLICATION

- Web-based system that built for the Cloud
- Accessible anywhere, anytime
- Easy to use

DATABASE

- Centralized, cloud-based storage
- Secure and protected data
- Real-time updates

SYSTEM

- Responsive Application compatible with Desktop and Mobile
- Automates routine tasks
- Integrates with other systems

IMPLEMENTATION

- On-premises or cloud options
- Quick and easy setup
- Customizable to your needs

LICENSE

- No Oracle license needed
- Flexible subscription plans
- Clear pricing

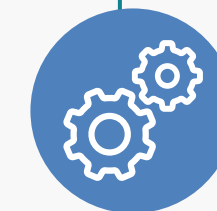

CAFM

Mobile App

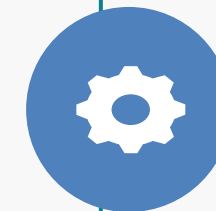

(either from Play Store or more securely from LAN)

Our CAFM system features a mobile app designed to enhance the efficiency and accessibility of facility management tasks.

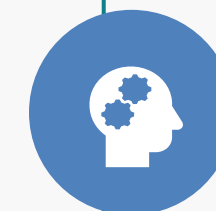

Available on both iOS and Android platforms, the app ensures that facility managers, technicians, and tenants can manage their responsibilities effortlessly on the go.

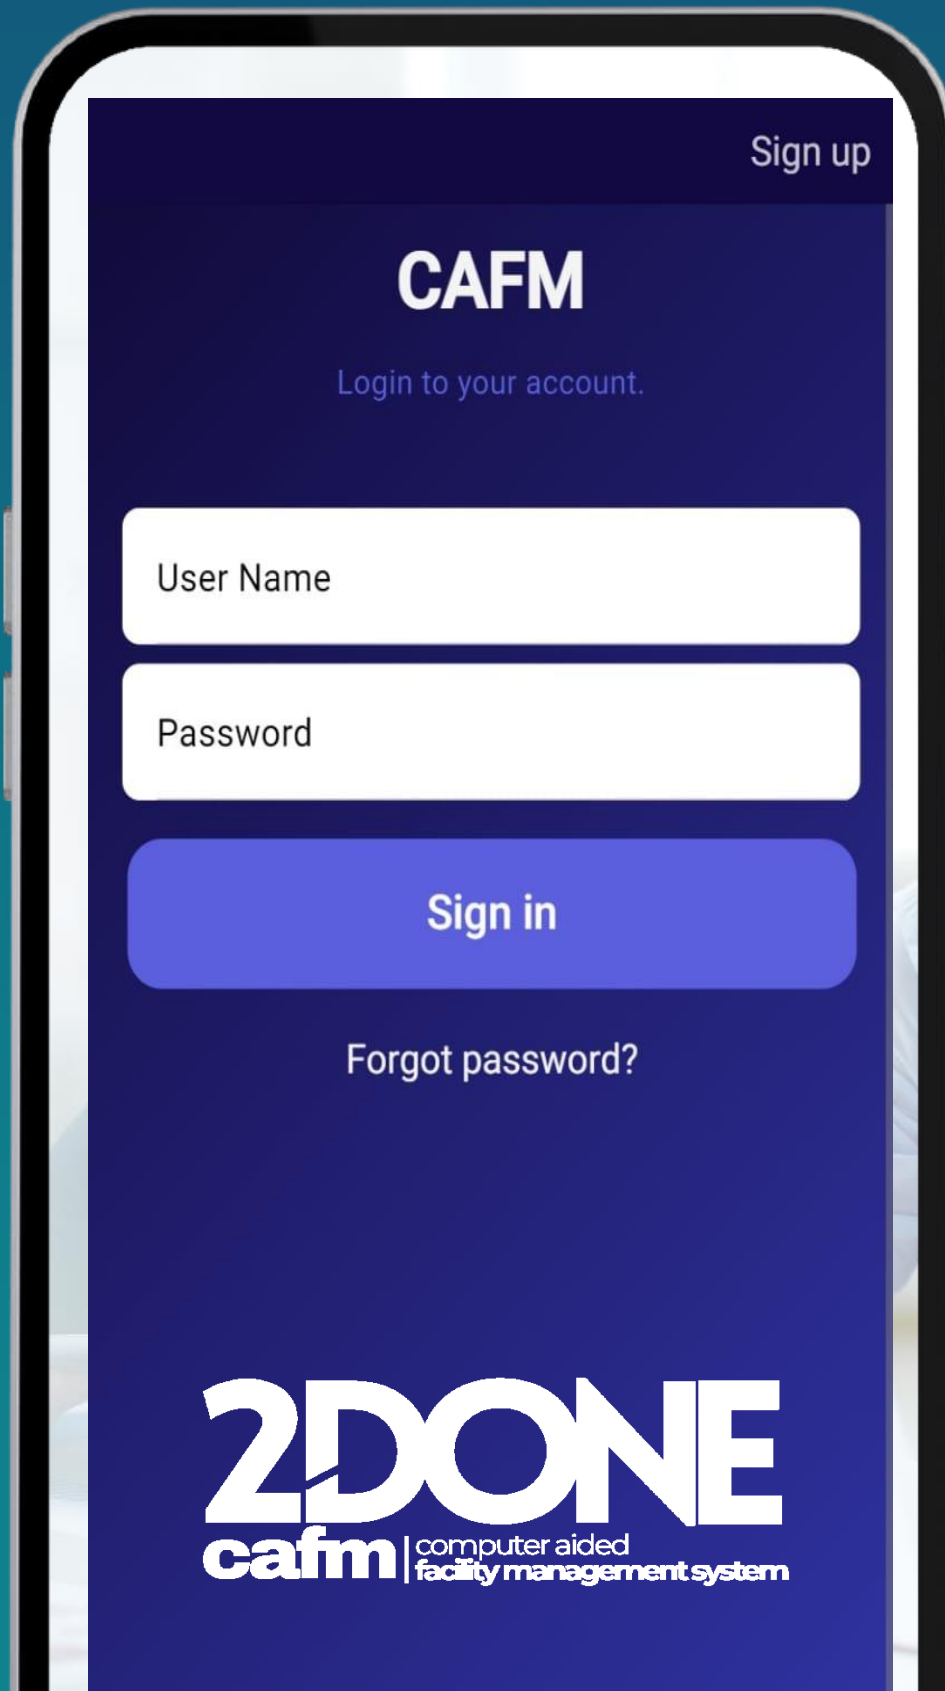

Manage reactive maintenance tasks directly from the app

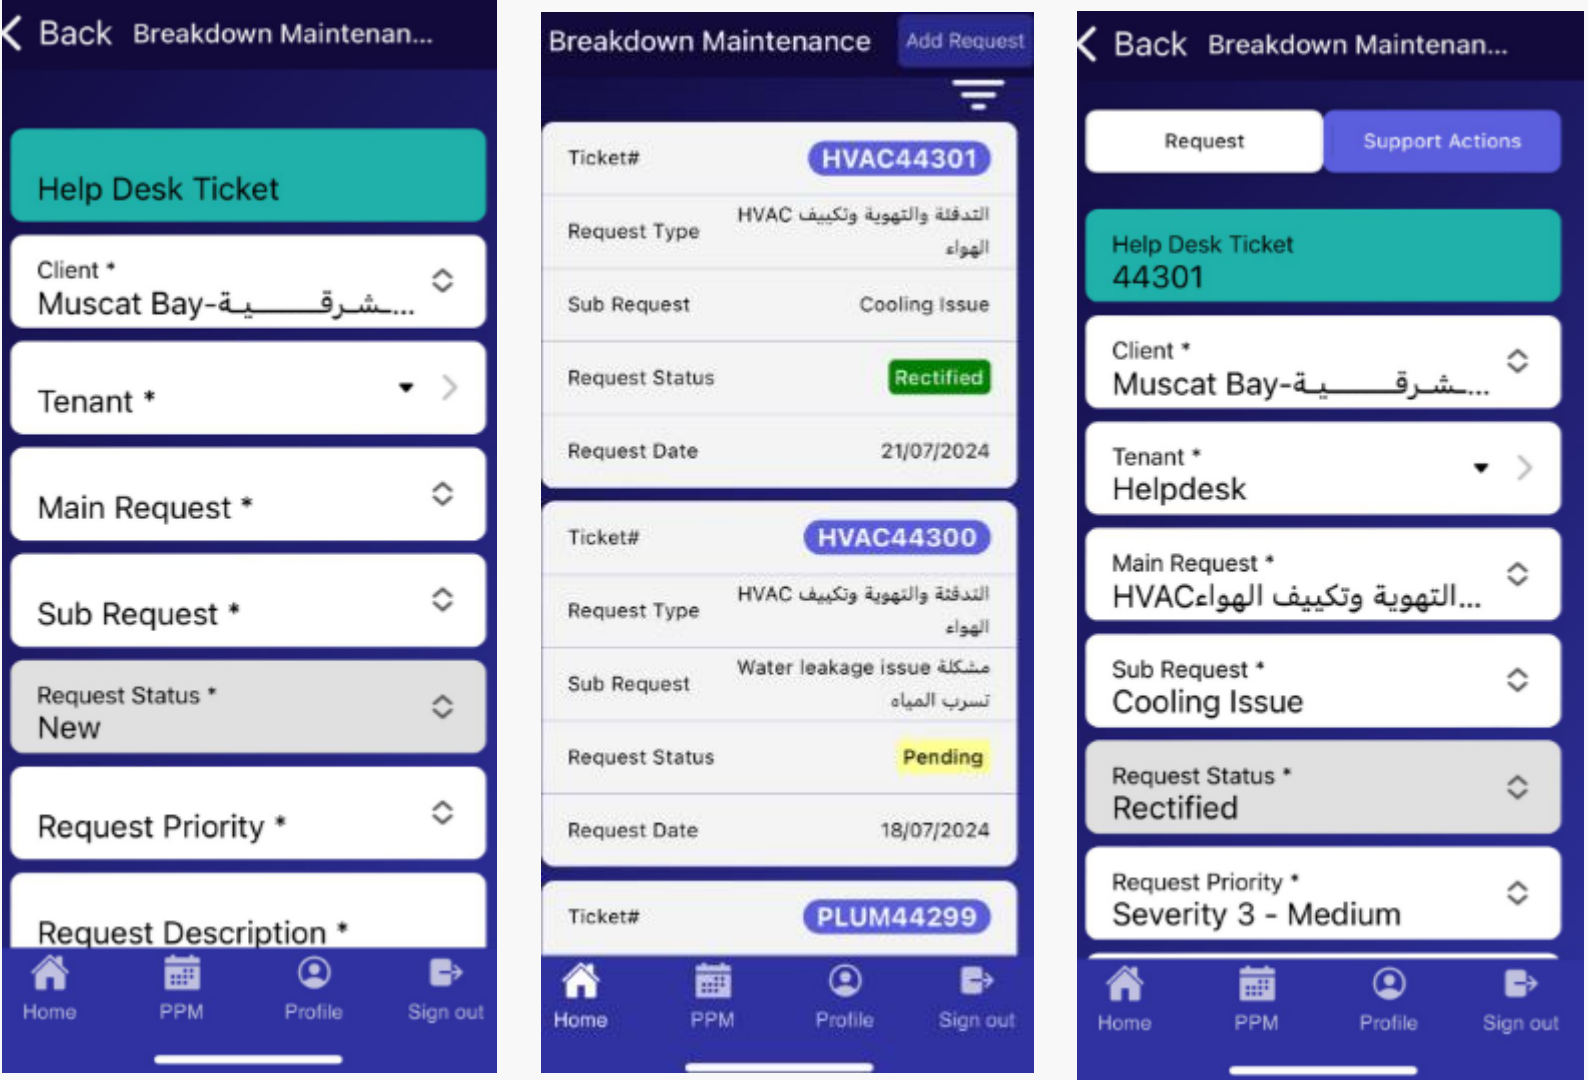

Create, update, and track maintenance requests in real-time

Raise tenant tickets, update and close maintenance tickets, and view request statuses.

Mobile App Screens Overview

DOWNLOAD AND ACCESS

Download: Users can easily download the app by scanning the provided QR code for iOS or Android. (either from Play Store or more securely from LAN)

Login: Secure login using Room No/Password ensures that only authorized users can raise and manage tickets.

Cloud-Based Access: The app is cloud-based, providing real-time access and updates across all devices.

CAFM Modules

These modules provide comprehensive solutions for efficient and effective facility management.
