About Wisdom IT Solutions

With 20 years of existence in Oman and a locally available expert software development and support team.

We have delivered over 200 projects, satisfied 150+ clients across various sectors, and established global partnerships with leading software companies.

About 2Done CAFM

Developed by Wisdom IT Solutions Oman, the 2Done CAFM system provides an all-encompassing solution for seamless facility management. This innovative platform empowers you to manage every aspect of your facilities effortlessly, featuring intuitive interfaces tailored for all organizational roles. With flexible deployment options available both on-premises and in the cloud, the system is designed to fit your unique operational needs. Engineered with robust security measures, the 2Done CAFM system guarantees your data remains protected at all times. Additionally, the system is highly scalable, allowing it to grow and adapt as your organization's requirements evolve.

Product Features

2Done CAFM system provides a comprehensive, web-based platform aimed at streamlining and improving facility management operations. It features a responsive application compatible with both desktop and mobile devices and can be deployed on-premises or in the cloud.

Our mobile app, available on both iOS and Android, empowers users to handle reactive maintenance tasks efficiently. The app allows for the creation, updating, and tracking of maintenance requests in real-time, providing convenience and enhancing productivity.

Functional Modules

Reactive Maintenance
Manage and respond to maintenance requests in real-time.

Planned Maintenance
Schedule and oversee regular maintenance tasks to ensure optimal operation.

Annual Maintenance
Plan and track annual maintenance activities for long-term asset care.

Asset Register Management
Track and maintain a comprehensive register of all assets

Helpdesk
Provide efficient support with a ticketing system for issue resolution.

Energy Management
Monitor and optimize energy consumption across facilities.

Vendor Management
Organize and manage relationships with service vendors and suppliers.

Space Management
Optimize space utilization and monitor space hierarchy with tree-level views

Visitor Management
Manage and streamline visitor access and appointments.

Mobile App (iOS & Android)
Access and manage facilities on the go with our mobile app.

Dashboards with Charts & Graphs
Visualize data and metrics for informed decision-making.
